

Waterproofing Systems and Technical Solutions

The Arena

“The Arena” Asia’s biggest and India’s first multi-purpose stadium was built with a dream “sports for all”. It is a Public Pvt Partnership model by Transtadia.

So when it came to selection of waterproofing solutions a team comprising of Consultants and Client’s experts were looking out for best systems. Our Team at Ahmedabad along with our authorized applicator M/s. Vipul Waterproofers, having experience of over 35 years in execution waterproofing projects were selected for waterproofing of “The Arena”. More than 7,000 sq.mt of area was waterproofed consisted of Deck Pool & Garden areas in the building. K10 PU Plus was suggested for the waterproofing of the pool area and K10 GRS 2 000 SF was suggested for the garden waterproofing, because of its anti-root properties.

Being associated for the best “The Arena “ by Transtadia makes all of us proud.
