

## Waterproofing Systems and Technical Solutions

### Rukmini Birla Hospital Project

The Rukmani Birla Hospital, is being developed for the Birla Group at Jaipur. This is a 195,000 Sq.ft. structure with basement + ground + 5 storey having 100 bed.

The major challenge which client faced was undulations in floor which would have made it impossible for vinyl floorings to be installed above.

PAREX India alongwith its approved applicator were invited for site visit. After understanding client's requirement, a solution involving LANKO 162 FLOWPRIME and LANKO 173 was proposed.

#### APPLIED PRODUCTS

- PRIMER APPLICATION WITH LANKO 162
- FLOWPRIME SELF LEVELLING UNDERLAYMENT WITH LANKO 173
