On July 19th 2012, Sebastián Piñera, president of the Republic of Chile, announced the refurbishment of some stadiums thorough all the country. Chile was elected to organize the 2015 American Soccer Cup and the FIFA World Cup U-17. As a result, Chilean sportive infrastructure needed to be adapted to the requirements set by the FIFA. Viña del Mar was elected by the ANFP (Chilean professional football association) to be one of the main Chilean cities welcoming both competitions.

After the stadium refurbishment, it increased its capacity to 25.000 spectators. It also included 735 m² of public bathrooms, 200 m² of meals hall and 94.5 m² conference room.
