

> Tile Setting and Flooring Materials

> Artisan Luxury Apartment Complex, Chiswick, NSW

The Artisan Luxury Apartment Complex was built on a former industrial car park. The boutique 129 unit development is spread across five buildings. It is surrounded by parkland and Sydney Harbour providing a lifestyle environment for the buildings occupants.

Davco acoustic underlay, waterproofing membranes and tile adhesives were used throughout the development in the hallways, living areas, kitchens and bathrooms.

Sound Zero Acoustic Mat reduces sound transmission through floor tiling systems making it ideal for this large development. It is a direct stick acoustic tiling system that sits flat for ease of use. All internal wet areas such as bathrooms and showers, were waterproofed with K10 Plus - a water based polyurethane waterproofing membrane.

F1 Express was used as it is a highly flexible tile adhesive. It is fast setting to allow for same day grouting. Powder Mastic Flexible Tile Adhesive is ideal for translucent and light coloured tiles with an extended open time for longer repositioning of tiles. Powder Mastic features our Dust Less Technology which means less dust, less mess and faster clean up. Dribond Off White Tile Adhesive is a cement-based adhesive ideal for application on rigid substrates. With a very good strength and flexibility, it is suitable for internal and external applications.

APPLIED PRODUCTS

- Sound Zero Acoustic Mat

ALSO

- K10 Plus Waterproofing Membrane
- F1 Express Tile Adhesive
- Powder Mastic Tile Adhesive
- Dribond Off White Tile Adhesive
