> Sagamore Pendry Hotel

In a project where luxurious sophistication is the name of the game, each and every detail, no matter how large or small, makes all the difference in the final presentation. The Sagamore Pendry Baltimore, of premier hospitality brand Pendry Hotels, is the newest hot spot for luxury travel and indulgence in Baltimore's historic yet newly renovated Fell's Point neighborhood.

Developed in collaboration between Montage International and Sagamore Development Company, the hotel boasts 128 luxury guestrooms and suites and several glamorous restaurants, lounges and bars. From the American Industrial Age themed murals and décor, to the Grand Ballroom with sky-high ceilings, to the visionary choice and placement of stone tiles throughout the building, each unique detail of the Pendry Baltimore denotes and delivers a story and vision.

When it comes to the critical waterproofing under tile in the stone-clad bathrooms, guest and public, MERKRETE's BFP waterproofing membrane system was the only solution. Durable and long lasting, this membrane system is designed for heavy-duty applications, promising zero leaks or cracks, even with severe exposure and high amounts of traffic. In addition to the waterproofing membrane system the hotel required, MERKRETE was the trusted source yet again in providing high- performance, sustainable grout in the lobby and bar floors.
