

Waterproofing Systems and Technical Solutions

Hard Rock Hotel, Penang

Hard Rock Hotel Penang is an iconic luxury resort situated along the famous beaches of Batu Ferringhi, Penang with 250 guestrooms and water lagoon.

The hotel's internal and external facade encountered endless hair line cracks and LANKO103 was applied to repair and prevent any imminent hairline cracks due to its skim smoothing rendering paste and repairing surface defects quality. The consultant performed durability test on LANKO 103 by using sprinkling method to ascertain LANKO 103 water tolerance and resistance. The experiment proves satisfactory.

DAVCO TTB 98 and DAVCO Davelastic 98 are applied on the whole tiling area which includes lobby, rooms, swimming pool and external walkways.
