

> Waterproofing Systems and Technical Solutions

> Office of the Ombudsman (Roofdeck)

The Office of the Ombudsman building is located along Agham Road in Diliman Quezon City. The project requires a re-waterproofing of the whole roof deck of approximately 1,000 sqm of one of the existing buildings.

This project involves the removal of the previous waterproofing material, treatment and repair of cracks using LANKO 603, slope correction then segment application of K10 Plus waterproofing coating.

DAVCO K10 Plus is a flexible UV-resistant PU waterproofing and sealing membrane that is ideal for concrete roofdeck.
