

Waterproofing Systems and Technical Solutions

The Visionaire

The Visionaire Executive Condo is Singapore's first Smart Home EC which combines technology with equally smart design, a promising location and convenient amenities.

With its efficient unit design, units are cleverly designed to maximize the use of space, in Singapore where space comes at a premium.

The use of prefabricated bathroom unit (PBU) is mandatory for all non-landed residential Government Land Sale (GLS) sites from 1 Nov 2014 onwards. With the push towards pre-fabrication by the government in Singapore, The Visionaire uses Prefabricated Bathroom Units for all its bathrooms.
