> The Marq

The Marq on Paterson Hill is situated on a prime freehold location with large well-appointed living spaces within the metropolitan city of Singapore.

With its bold and innovative architecture and design, The Marq is an ultra-luxurious condominium that offers luxurious space and airiness of double - volume ceilings, with spectacular panoramas of the city skyline. This exclusive condominium has 66 residences set on a sprawling 125,000sqft private estate with apartment sizes range from 3,000sqft to 15,000sqft.

In this luxurious condominium, every unit within the Signature Tower has a 15 meter private lap pool cantilevered over the city skyline for the exclusive enjoyment of the owners. The architects needed a tried and proven waterproofing system for these cantilevered lap pools, YJ Waterproofing was appointed the waterproofing applicator and DAVCO K11 FLEX was selected because of its stellar track record.
